6ab8c3ef30f9767f87730407

Project Name

Streamlining IT Procurement: Automating Standard Laptop order with flow designer

Maximum Marks

4 Marks

Empathy Map Canvas:

User: Standard Laptop requestor

SAYS

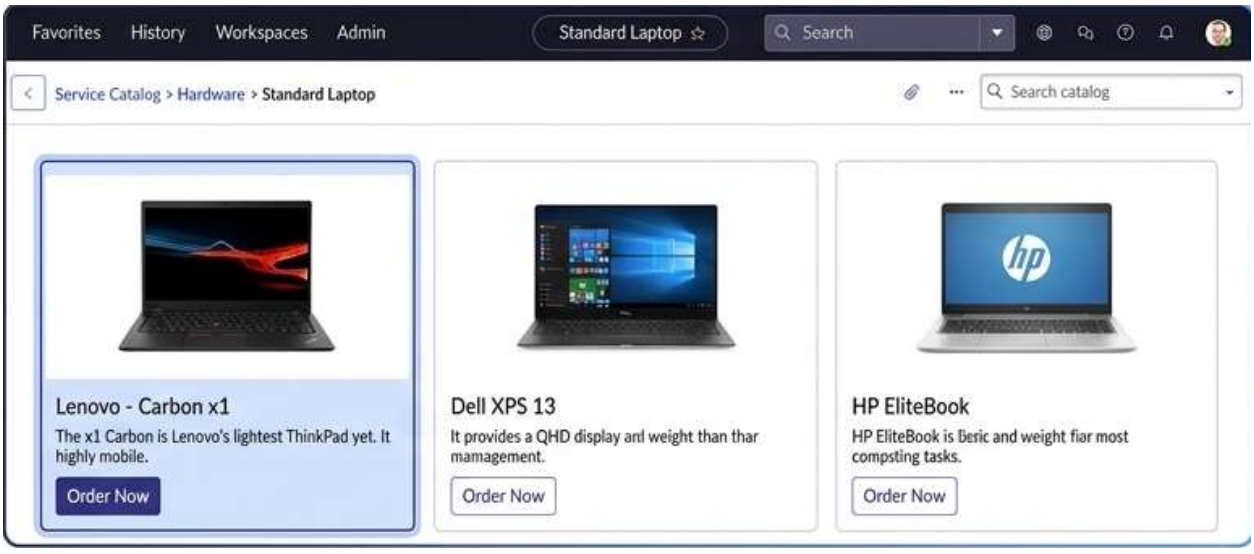

The user submits a Standard Laptop request through the Service Catalog and expects the approved request to proceed to configuration efficiently.

THINKS

The user expects the approved laptop request to be processed without unnecessary manual delay.

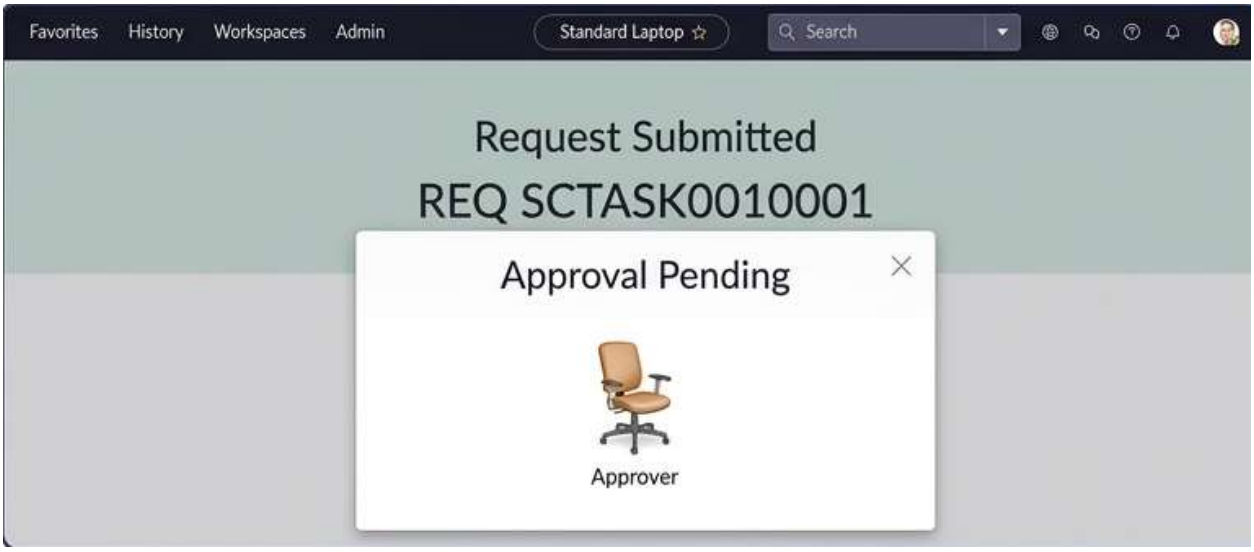

DOES

Submits a Standard Laptop request through the Service Catalog and waits for the request to be approved and processed.

FEELS

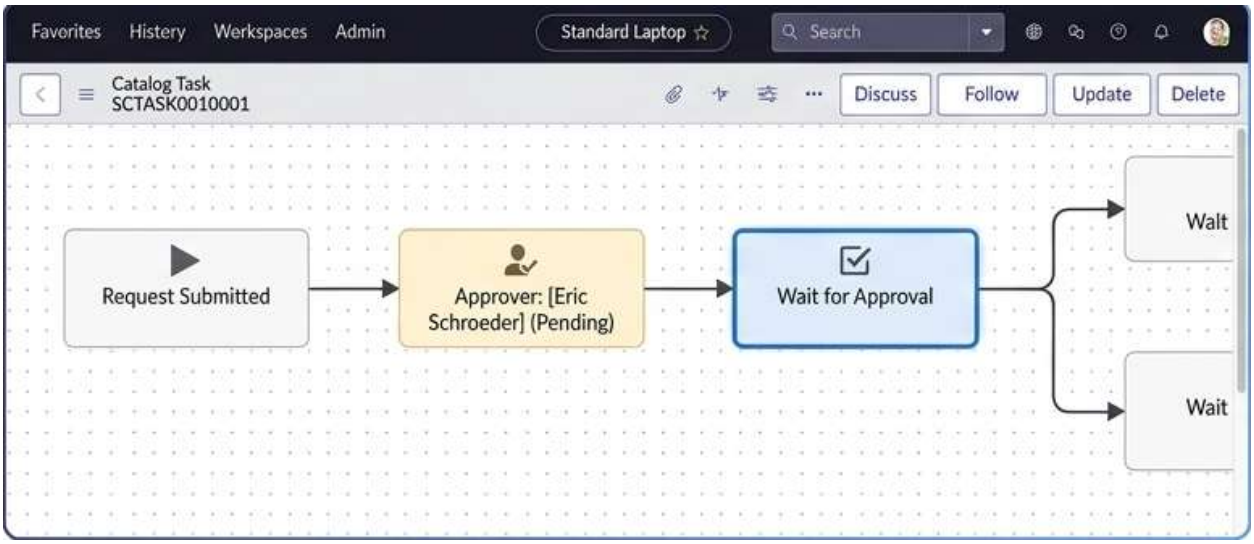

The user may feel delayed while waiting for the laptop configuration process to be completed.

Empathy Map Canvas — Standard Laptop Task Flow

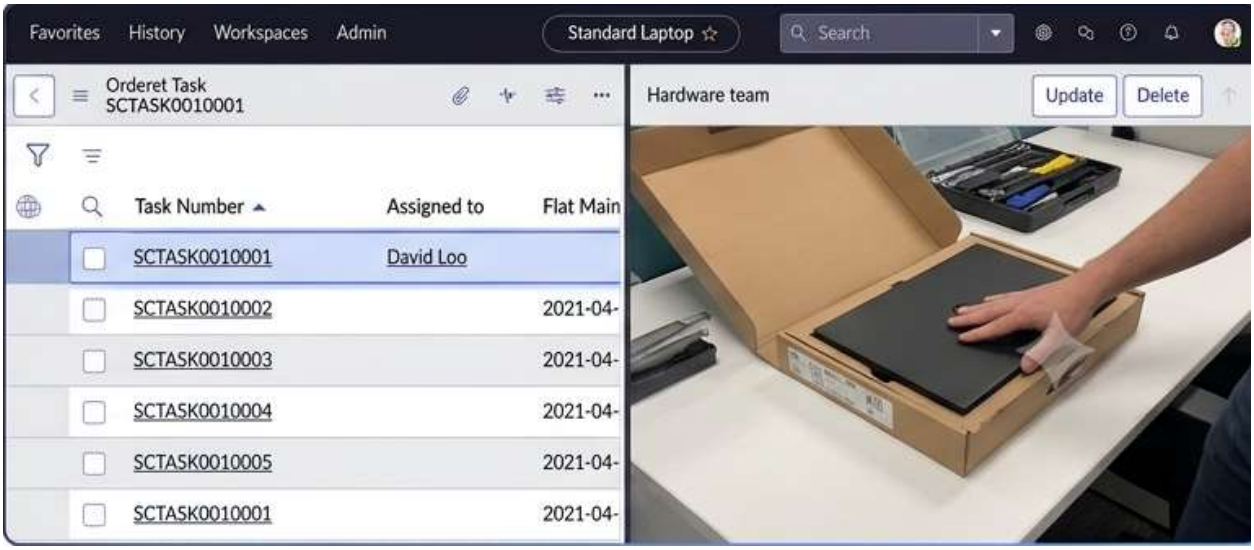

PAINS

Manual task creation and assignment can increase processing time and manual overhead.

GAINS

Automatic creation of the Catalog Task and assignment to the Hardware team after the configured approval condition is reached can reduce manual effort, improve processing speed, and support timely laptop configuration.

USER GOALS

To have an approved Standard Laptop request processed efficiently and routed to the appropriate Hardware team for configuration.

CHALLENGES

The supplied project description does not specify additional user challenges beyond manual task creation, assignment, processing time, and waiting for configuration. [TO BE FILLED]
