Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date

3.10.2026

Team ID

6ab8c3ef30f9767f87730407

Project Name

Streamlining IT Procurement: Automating Standard Laptop order with flow designer

Maximum Marks

4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Standard Laptop Request	User submits a Standard Laptop request through the Service Catalog.
FR-2	Approval Condition	Flow executes once the Standard Laptop request reaches the configured approval condition.
FR-3	Catalog Task Creation	Create a Catalog Task under the related Requested Item for laptop configuration.
FR-4	Task Assignment	Assign the created Catalog Task to the Hardware assignment group.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, clearly labelled Service Catalog form so users can raise a laptop request easily and track its status.
NFR-2	Security	Role-based access (ACLs): only authorised approvers approve, and only the Hardware group works the task.
NFR-3	Reliability	Flow runs consistently once approved, creating one Catalog Task per item; errors are logged for review.
NFR-4	Performance	Catalog Task is created and assigned to the Hardware group within seconds of approval.
NFR-5	Availability	Runs on the ServiceNow platform, so it is available whenever the instance is available (24x7).
NFR-6	Scalability	Handles many concurrent requests and can be extended to other hardware items or groups via configuration.
