Project Design Phase
Proposed Solution Template

Date	3.10.2026
Team ID	6ab8c3ef30f9767f87730407
Project Name	Streamlining IT Procurement: Automating Standard Laptop order with flow designer
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	The current Standard Laptop request process involves manually creating and assigning configuration tasks after approval. This can cause delays and require additional effort. The proposed solution automates task creation and assignment once the request is approved.
2	Idea / Solution description	The solution uses ServiceNow Service Catalog and Flow Designer to automate the laptop procurement workflow. After approval, Flow Designer automatically creates a Catalog Task under the related Requested Item and assigns it to the Hardware team for further processing.
3	Novelty / Uniqueness	The solution provides an automated connection between approved Standard Laptop requests and the Hardware team. It eliminates unnecessary manual task creation and ensures that the correct team receives the task automatically..
4	Social Impact / Customer Satisfaction	Automation reduces waiting time, minimizes manual errors, and improves the overall user experience. Customers can receive faster processing of their laptop requests, while the IT team can focus on other important activities.
5	Business Model (Revenue Model)	Reduces operational costs by minimizing manual work and improving productivity.
6	Scalability of the Solution	Can be extended to automate other IT asset and procurement requests.
