STANDARD LAPTOP TASK AUTOMATION – SERVICENOW

Project Documentation

Project Title	Streamlining IT Procurement: Automating Standard Laptop order with flow designer
Team Members	[TO BE FILLED]
Team ID	6ab8c3ef30f9767f87730407
Date	3.10.2026

1. Introduction

- Project Title: Standard Laptop Task Automation – ServiceNow
- Team Members: [TO BE FILLED]
- Team ID: [TO BE FILLED]

2. Project Overview

Purpose: The project automates the processing of Standard Laptop requests in ServiceNow. After the request satisfies the required approval condition, Flow Designer automatically generates a Catalog Task under the related Requested Item and sends it to the Hardware assignment group.

Key Features:

- Standard Laptop request submission through Service Catalog.
- Automated approval-based processing.
- Flow Designer based workflow execution.
- Automatic Catalog Task generation.
- Automatic assignment to the Hardware team.
- Flow Assignment between the catalog item and configured flow.

3. Architecture

Service Catalog: Provides the Standard Laptop catalog item through which users can submit laptop requests.

Approval Process: The submitted Standard Laptop request proceeds when the configured approval condition is satisfied.

Flow Assignment: Connects the Standard Laptop Service Catalog item with the Standard Laptop Task Flow Designer flow.

Flow Designer: The Standard Laptop Task Flow executes the configured automation after the request reaches the required approval condition.

PDFBEAR.COM - Free Ver.

Catalog Task: The flow automatically creates a Catalog Task under the related Requested Item.

Hardware Assignment Group: The created Catalog Task is assigned to the Hardware assignment group for laptop configuration.

4. Setup Instructions

Prerequisites:

- ServiceNow instance: [TO BE FILLED]
- Required ServiceNow access/role: [TO BE FILLED]
- Standard Laptop Service Catalog item: [TO BE FILLED]
- Standard Laptop Task Flow Designer flow: [TO BE FILLED]

Configuration:

1.Set up the Standard Laptop catalog item in ServiceNow.
2.Define the required approval condition.
3.Create the Standard Laptop workflow in Flow Designer.
4.Link the catalog item with the flow using Flow Assignment.
5.Configure automatic Catalog Task creation.
6.Set the Hardware assignment group for the generated task.
7.Test the complete request-to-task workflow.

5. Configuration Structure

- Service Catalog: Standard Laptop catalog item.
- Flow Assignment: Connects the Standard Laptop catalog item with the Standard Laptop Task Flow.
- Flow Designer: Standard Laptop Task Flow.
- Requested Item: Related Requested Item generated for the catalog request.
- Catalog Task: Task automatically created by the flow.
- Assignment Group: Hardware.

6. Running the Application / Process

The Standard Laptop automation process is executed through the ServiceNow Service Catalog.

8. The user submits a Standard Laptop request through the Service Catalog.
9. The request reaches the configured approval process.
10. Once the configured approval condition is satisfied, the Standard Laptop Task Flow is executed.
11. The flow creates a Catalog Task under the related Requested Item.
12. The Catalog Task is assigned to the Hardware assignment group.
13. The Hardware team performs the required laptop configuration.

7. Automation / Flow Documentation

Catalog Item	Standard Laptop
Flow Name	Standard Laptop Task Flow
Flow Assignment	Standard Laptop Service Catalog item → Standard Laptop Task Flow Designer flow
Trigger / Condition	Configured approval condition
Action	Create a Catalog Task under the related Requested Item
Assignment Group	Hardware
Additional Flow Actions	[TO BE FILLED]

8. Access and Approval

The Standard Laptop request is processed through the configured ServiceNow approval condition. Once the required approval condition is satisfied, the automation proceeds with the creation and assignment of the Catalog Task.

- Approval condition: [TO BE FILLED]
- Approval roles/users: [TO BE FILLED]
- Required ServiceNow roles: [TO BE FILLED]

9. User Interface

The Standard Laptop request is submitted through the ServiceNow Service Catalog.

- Standard Laptop Service Catalog item: [SCREENSHOT TO BE ADDED]
- Laptop request submission: [SCREENSHOT TO BE ADDED]
- Approval status: [SCREENSHOT TO BE ADDED]
- Flow Designer – Standard Laptop Task Flow: [SCREENSHOT TO BE ADDED]
- Flow Assignment configuration: [SCREENSHOT TO BE ADDED]
- Generated Catalog Task: [SCREENSHOT TO BE ADDED]
- Hardware assignment group: [SCREENSHOT TO BE ADDED]

10. Testing

Test Case	Expected Result	Status
Submit Standard Laptop request	Request is successfully submitted	[TO BE FILLED]
Verify approval condition	Request proceeds when configured approval condition is satisfied	[TO BE FILLED]
Verify Flow Assignment	Standard Laptop item is connected to Standard Laptop Task Flow	[TO BE FILLED]
Verify Flow Designer execution	Standard Laptop Task Flow executes for the approved request	[TO BE FILLED]
Verify Catalog Task creation	Catalog Task is created under the related Requested Item	[TO BE FILLED]
Verify assignment	Catalog Task is assigned to	[TO BE FILLED]

11. Screenshots or Demo

The project demonstration should show the complete Standard Laptop request automation flow:

Service Catalog → Standard Laptop Request → Approval Condition → Flow Designer → Catalog Task → Hardware Assignment Group

- Demo URL: [TO BE FILLED]
- ServiceNow Instance: [TO BE FILLED]
- Screenshots: [TO BE ADDED]

12. Known Issues

The following project information has not been provided and therefore requires completion:

- ServiceNow instance details: [TO BE FILLED]
- Approval configuration details: [TO BE FILLED]
- ServiceNow roles/permissions: [TO BE FILLED]
- Detailed flow actions: [TO BE FILLED]
- Testing results: [TO BE FILLED]
- Known defects/issues: [TO BE FILLED]

13. Future Enhancements

Future Enhancement 1: Automate additional IT asset requests.
Future Enhancement 2: Add automatic status notifications.
Future Enhancement 3: Extend the workflow to other hardware items.
Future Enhancement 4: Improve tracking and reporting of procurement requests.

Conclusion

The Standard Laptop automation using ServiceNow Flow Designer simplifies the laptop procurement process by reducing manual task creation and assignment. Once approval is completed, the system automatically creates the required Catalog Task and routes it to the Hardware team. This improves processing efficiency, reduces delays, and provides a smoother request fulfillment process.
